

UltraSun[®]
pioneers in responsible tanning since 1974

The Brand Ultrasun, a pioneer since 1974

UltraSun proudly announces the launching of the new Ultrasun brand concept, inspired by the many years of successful development of tanning equipment, guaranteeing responsible tanning sessions to our clients worldwide.

Celebrating the foundation of the company in 1974, Ultrasun International is claiming the well deserved slogan "Pioneers in responsible tanning since 1974".

We, Ultrasun make you a brand promise, giving our core value - responsibility, true meaning in every aspect of our business and everyday life.

Willem Fabels

Responsible Tanning The New Spectacular

Q25

The New Q25 is the crown of the Q series, presenting the ultimate Tanning DeLuxe experience. It makes a statement with its unique features, highest quality and stunning stylish design. The combination of 15 high pressure Sunfit RS 1000W lamps with our well known "Xtreme Filter System" and 21 Sunfit Professional VX+180W lamps in the base ensures an exceptional tanning session.

gigaSun

One further decisive innovation in the Gigasun is not apparent at first sight. The inside of the novel high pressure facials conceals a perfect system of reflectors. Here the reflection of indirect rays makes optimum use of the available UV output. As a result, one row of UV high pressure lamps are enough to achieve perfect tanning results. As well as giving a quicker and more intense tan, most importantly this means even bronzing. Thanks to the intelligent reflector geometry inside the high pressure cassette, the UV output is spread powerfull over the entire tanning area.

“We only use Sunfit lamps and our clients keep coming back for more,”

Isabelle Theophile
Owner tanning salon
Point Soleil
Rue Vavin,
Paris - France

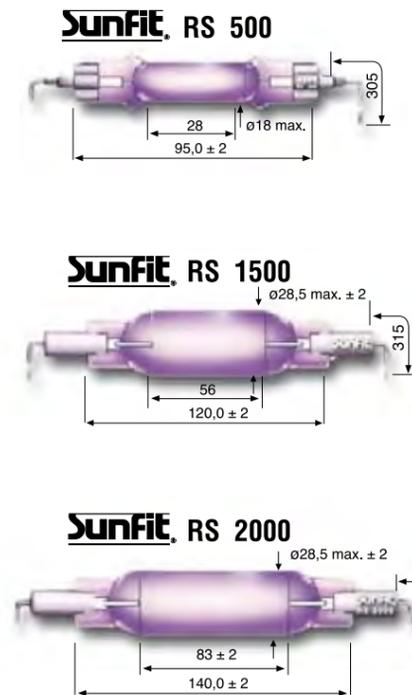

Isabelle Theophile keeps close tabs on what her clients want. Her tanning salon has a high reputation to uphold for performance and service. The professional approach to the standards of the tanning equipment used in the salon has earned her a large and loyal clientele. Her business acumen has turned this loyalty into a thriving business. The same good business sense led her to opt for Sunfit lamps, the best combination of quality and profitability money can buy.

“Sunfit lamps make all the difference to my studio’s competitive edge,”

Sara & Mike Adams
Owners Tan Unique
Ft. Smith, AR USA

You can't afford to stand still. The beauty and wellness business is constantly on the move. Mike Adams knows what it takes to keep his beauty center ahead of the competition. That's why for years now he's relied on Sunfit lamps to keep his sunbeds at top performance 24-7! That's the kind of heavy duty demand Sunfit lamps are made to handle without a hitch.

Xtreme Power and Xtreme Intensity

As a result of their pure quartz glass construction, Sunfit high pressure burners combine a high UV output with an extremely long working life, with the additional advantage to you of reduced studio operating costs.

SUNFIT
PROFESSIONAL®

NEW! SUNFIT accessories:

Sunfit® Suntronic

With the Sunfit Suntronic UVA meter you can check the condition of your lamps and burners quickly and efficiently. Via the hypersensitive sensor the electronic display accurately registers UVA values between 1 and 199 MW/cm².

Sunfit® Display

Sunfit® E-power starter

- Easier lamp start-up with less chance of ends turning black
- Longer lifetime – at least 400,000 starts
- 10-year lifetime
- UL Listed

Sunfit Dreamer

The Sunfit Dreamer is a headrest which can be used when dreaming away in one of the world famous Ultrasun sunbeds.

Sunfit® Sunglasses

Sunfit Sunglasses have been specially developed for optimum safety under UVA solarium, rapid tanning systems and in the natural sun. Sunfit Sunglasses are manufactured under constant laboratory control and meet the strict FDA and CE standards for UV protection.

Sunfit® Paytronic

The Sunfit Paytronic coin box is simple to use and reliable. The display guarantees perfect control in your studio.

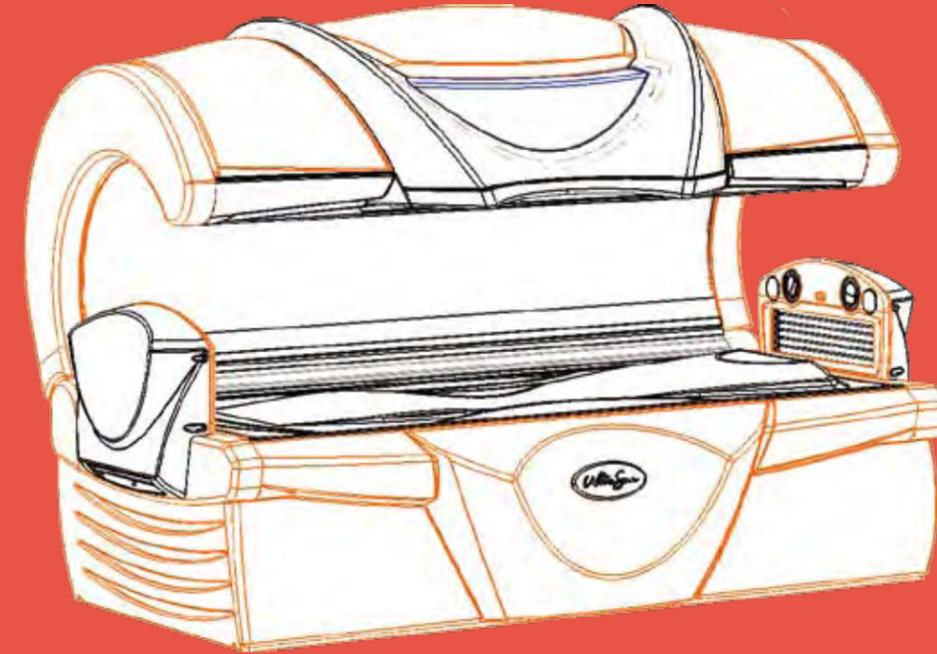

Research and Development: Magnificent Design from Ultrasun

The most beautiful equipment, the most impressive innovations ... It all begins with an idea. At Ultrasun, when looking at the market and various market segments, it's usually the marketing people who come up with the first ideas. Situations which arise in the market are of great importance.

What exactly do we want? In which part of the market do we wish to profile ourselves with the new device? That has to be well established up front.

The magnificent futuristic design of the new Q25 is a symbol of the latest technological trends in the global tanning market.

Power Control 6

The PowerControl 6 is a remote control box which allows you to operate 1 up to 6 sunbeds from one central point.

Every Ultrasun sunbed can be managed via the remote control box so tanning professionals can appreciate the convenience of using the PowerControl 6, when managing a tanning studio/area with a number of tanning booths. The most attractive feature of the PowerControl 6 is that it shows the total number of operating hours of sunbed and the pulses can be read centrally, from just one system.

The PowerControl 6 is easy to use and maintain. You can program sessions from 0 until 60 minutes. In addition, the pre-run and after cooling of the sunbed can be adjusted from 0 to 9 minutes.

Futuristic Design

Q15

The secret to success lies in the Q15 series from Ultrasun. This luxurious series will keep your customers tanned to perfection. With its aerodynamic lines, futuristic design and superb performance, the Q15 takes you to the next level. For achieving the exceptional tan your customers desire, the Q15 is available in High Power, Magic Power and Magnum Power to suit every desire.
